

Tech Strategy for Growing Companies

As your outsourcing partner, we believe NetSuite is the best fit for you for many reasons. One of the biggest reasons is because we regularly see clients outgrow their systems in ways that impact a company's focus, costs and operational efficiency. The scenarios outlined below illustrate why an increasing number of fast growth clients are using NetSuite from Birth to Billions in revenue.

-  Time
-  Money
-  Focus
-  Aggravation
-  Operational Inefficiency
-  Start Over

Your experience as you grow if you deploy NetSuite as the technology platform we use to deliver our services to you.	Your experience using a system designed to run the financials of a small business, like Xero, Quickbooks, or Intacct.
I'm getting a lot of customers – I need a CRM!	
<p>Ask your outsourcing partner to enable NetSuite's robust CRM system at no additional cost aside from users.</p> <p style="text-align: center;"></p>	<p>Find a CRM system, buy licenses, implement, and choose between the headache of integrating with your accounting system or losing time manually entering data into multiple systems.</p> <p style="text-align: center;">  </p>
We're getting too big to handle operations in spreadsheets – we need a Project or Inventory System!	
<p>Ask your outsourcing partner to enable Projects or Inventory at no additional cost.</p> <p style="text-align: center;"></p>	<p>Find a Project/Inventory system, buy licenses, implement, and integrate to your accounting and CRM system.</p> <p style="text-align: center;">   </p>
We're still growing and need a mid-market system!	
<p>Transfer your existing NetSuite license to your ownership with one signature. No need to re-implement or migrate data. No disruption to your outsourcing or operations.</p> <p style="text-align: center;"></p>	<p>Back to the start again—the small business systems you use no longer work. Time to find and buy a mid-market system needing to implement, migrate data, re-train staff, etc.</p> <p style="text-align: center;">     </p>
We're going global! Help!	
<p>Enable language, multi-currency, multi-subsidiary and international localization in NetSuite.</p> <p style="text-align: center;"></p>	<p>Your system cannot handle this well. You're forced to start from scratch or use a different system in every country you expand into.</p> <p style="text-align: center;">    </p>
I need to customize my system to support my IPO!	
<p>Your NetSuite Partner that has been providing outsourcing is also a NetSuite expert that can help configure NetSuite as you join the hundreds of public companies using NetSuite.</p> <p style="text-align: center;"></p>	<p>Sorry, the mid-market system you bought cannot be easily customized to meet this need. You'll need a high cost developer and a few more integrations to support the requirements of being a public company.</p> <p style="text-align: center;">    </p>
